

## Product Procurement

Our technology CUSO, Think|Stack, applies computer product and credit union industry knowledge to product procurement services. Think|Stack listens to the needs of each client to help empower the credit union through the entire IT procurement process, whether it is for a single item, or to assist with provisions for a new branch location or branch remodel.

### Key Benefits

1. Think|Stack manages every aspect of the procurement cycle including product research, order fulfillment, shipping, and RMA logistics.
2. Think|Stack manages complex licensing programs, authorizations, and support renewals.
