

CORPORATE CENTRAL CREDIT UNION
FINANCIAL SOUNDNESS REPORT

September 2026

This monthly report is intended to provide transparency regarding Corporate Central Credit Union's key financial measurements. The report is a supplement to the monthly financial statements and other due diligence material that can be found in the Due Diligence Center of our website – corpcu.com.

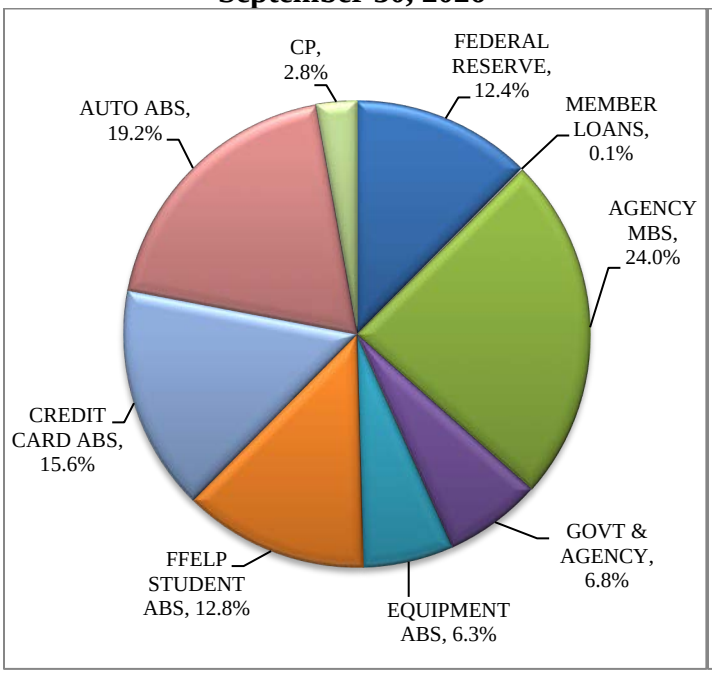

Corporate Central Credit Union

Diversification

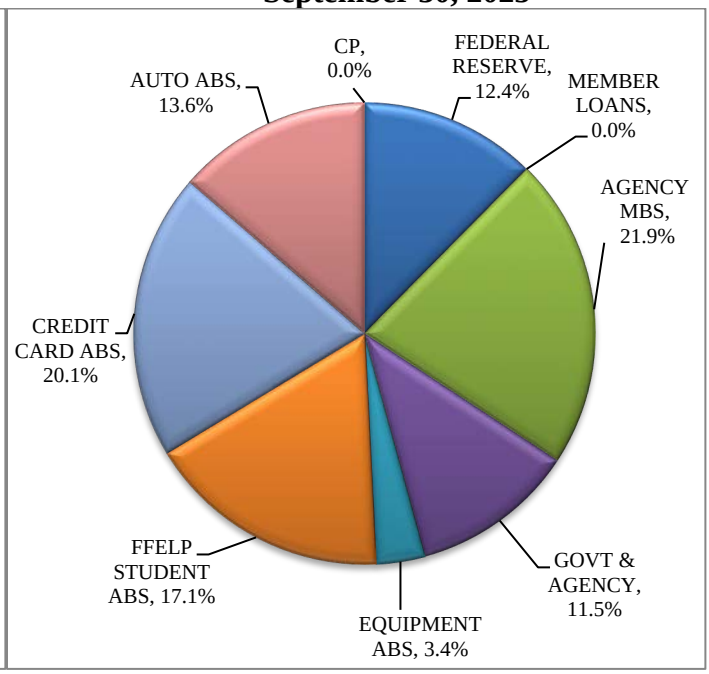

As of September 30, 2026, Corporate Central had 12.4% of the investment and loan portfolio in deposits at the Federal Reserve. Investments in credit card asset-backed securities (ABS) represented 15.6%, FFELP student loan ABS, which are comprised of student loan-backed securities that are at least 97.0% guaranteed by the Department of Education, accounted for 12.8%, auto loan/lease ABS represented 19.2%, and equipment ABS represented 6.3% of the portfolio. Commercial Paper (CP) represented 2.8%, agency mortgage-backed securities, including agency commercial mortgage-backed securities (MBS) represented 24.0%, government & agency debentures represented 6.8%, member loans comprised 0.1%, and Home Equity ABS accounted for less than 0.01% of the total portfolio.

Corporate Central's Portfolio Breakdown (Excluding Cash) Year over Year

September 30, 2026

September 30, 2025

The risk rating breakdown and unrealized loss of ($25,754,149) on our investment portfolio can be seen below. Corporate Central classifies all marketable securities holdings as Available-For-Sale (AFS), which means all investments are marked-to-market monthly. Market yields have trended higher over the past few months, which has led to an unrealized loss. However, yield volatility in recent months has caused fluctuations in monthly valuations.

Marketable Securities as of September 30, 2026

	Book Value	Market Value	Unrealized G/L
U.S. Gov't/Agency	$820,666,284	$810,311,479	($10,354,805)
Minimal Amount of Credit Risk	$1,512,318,623	$1,496,920,217	($15,398,406)
More than a Minimal Amount of Credit Risk	$72,957	$72,019	($938)
Totals	$2,333,057,864	$2,307,303,715	($25,754,149)

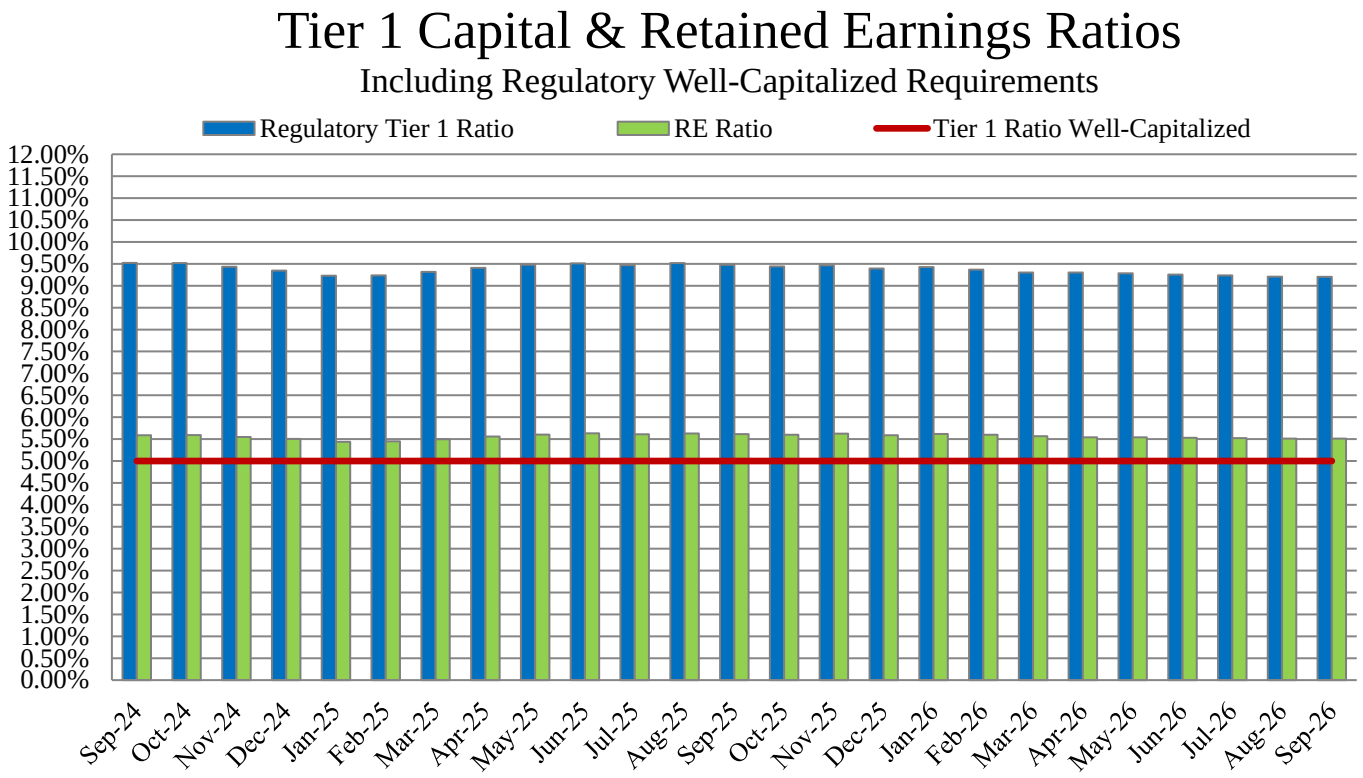

Corporate Central's Capital Position as of September 30, 2026

	9/30/2026 Capital	Capital Ratios*	Risk-Based Capital**	Regulatory Requirements–Well Capitalized Levels	
				Current	Benchmark
Retained Earnings	$184,692,021	5.51%	12.04%		2.50% RE
Perpetual Contributed Capital (PCC)	$123,703,427	3.69%	8.06%		
Tier 1 (Core) Capital*	$308,395,448	9.20%	20.11%	5% Core & 6% (RB)	
Tier 2 Capital	$49,481,932	1.48%	3.22%		
Total Capital**	$357,877,380	10.68%	23.33%	10% (RB)	

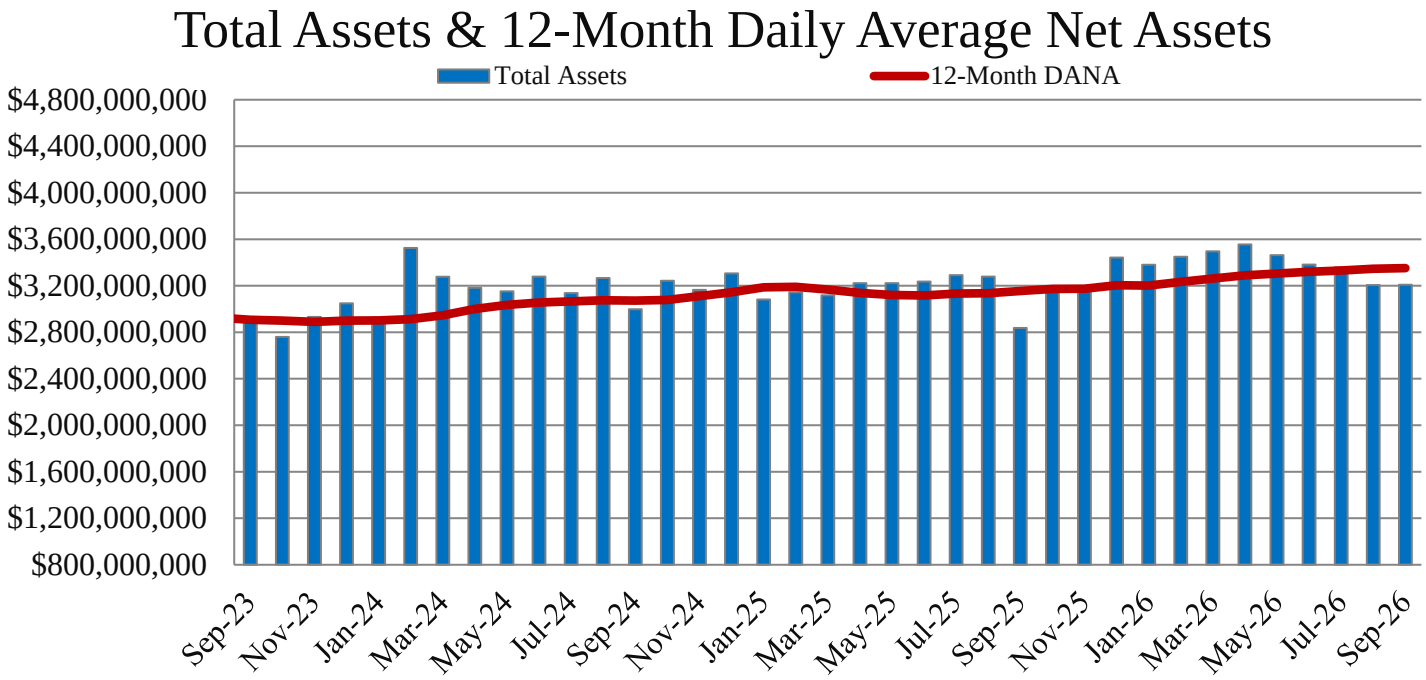

*Capital ratios are capital divided by 12-month moving Daily Average Net Assets (DANA).
**Risk-based (RB) capital ratios are capital divided by 12-month average, month-end Risk-Based Assets (RBA).

*12-Month DANA - $3,351,650,515 **12-Month Average RBA - $1,533,900,725

The graph below includes the Tier-1 Capital Ratios and RE Ratios and the regulatory well-capitalized requirement for the Tier-1 Ratio. Corporate Central has had very strong growth in Tier 1 capital over the past several years. After steady growth in deposits for more than a year, we have recently experienced slightly stronger growth. This combination of increasing capital levels and stronger Daily Average Net Assets growth has resulted in strong and relatively stable capital ratios. Corporate Central will continue to work hard to ensure that it is solidly positioned in relation to requirements and our members' needs.

As mentioned, in addition to growth in retained earnings and PCC, much of the change in the Tier 1 Capital Ratio over the previous few years can be attributed to changes in Corporate Central's 12-month DANA, which is the denominator in the capital ratio calculations. These changes, as can be seen below, have mainly been the result of membership growth, the liquidity cycle, and seasonal factors, which have impacted our members' liquidity levels. After over a year of steady growth in deposits beginning in the second half of 2023, the past year has seen deposit levels begin growing slightly faster.

Corporate Central's interest rate risk levels and economic value of capital as measured by Net Economic Value (NEV) and NEV Ratio remain well within regulatory limits as can be seen below.

Corporate Central's Net Economic Value (NEV) as of August 31, 2026

	Net Economic Value (NEV)*	% Change	Regulatory Limit	NEV Ratio	Regulatory Minimum
+300 Basis Points	$293,643,820	-14.44%	-20.00%	9.41%	2.00%
Base Case	$343,194,871	0.00%	0.00%	10.71%	2.00%
-300 Basis Points	$387,133,547	12.80%	-20.00%	11.78%	2.00%

*NEV is the fair value (FV) of assets in each scenario minus the FV of liabilities in that scenario and is considered the economic value of capital. Perpetual Contributed Capital (PCC) and Non-perpetual Capital Accounts (NCA) are considered capital in the NEV calculation.

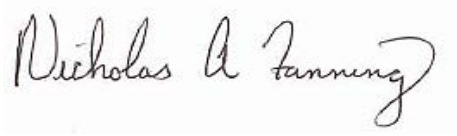

Additionally, Corporate Central's liquidity position remains strong. The majority of available liquidity is in the form of cash and external lines of credit. However, Corporate Central has additional marketable securities that can be used as required.

Liquidity Sources as of September 30, 2026

	Total	Available
Cash	$331,516,649	$331,516,649
Marketable Securities*	$770,496,089	$693,446,480
External Lines of Credit	$1,567,103,959	$1,331,103,959
Totals	$2,669,116,697	$2,356,067,088

*Market value of securities not pledged for other borrowings/lines of credit. Available amount is assumed to be 90% of market value.
